My Skills

Python Java SQL

C# .net Javascript

SASS HTML CSS

Postgresql SAP ASE

Git Docker Jenkins

py.test selenium React

Linux Windows

Experience

Software developer

Q-Free

2006 - Present

Started working on Q-Free on developer interfaces for Q-Free's hardware used by different projects in Via Verde Portugal.

Worked in an international team, to implement an operational backoffice for Ascendi's roadway tolling concessions, which is responsible for applying all business rules to highway passages, and deliver the data to a commercial backoffice interfacing with different collection agencies.

Worked to automate the data collection necessary for SLA and KPIs calculations, and display it in an explorable and user friendly way. This freed up time for the service and maintenance team to perform more important tasks.

Currently working on the continuous improvement of Ascendi's backoffice solution, leading a small team on bug fixing tasks, and the conception and implementation of new features, or business rules changes.

Software developer Intern

Sybase Portugal

February 2005 - August 2005

Worked on the maintenance of several internal applications helping with the implementation of new features and bugfixes.

My Languages

Portuguese
